

10x

Faster release cycles

Shift-Left

Security integration

FedRAMP

Aligned pipelines

KEY CAPABILITIES

- Legacy App Modernization
- Cloud Migration
- CI/CD Automation
- DevSecOps
- Test Automation
- API Modernization
- UX Modernization
- Managed Pipelines

# Application Modernization & DevSecOps Solution

Modernize Applications. Accelerate Delivery. Improve Outcomes.

## THE CHALLENGE

### Legacy Applications Are Slowing Your Mission

Aging applications built on outdated architectures are expensive to maintain, slow to change, and increasingly incompatible with modern cloud and security requirements. Long delivery cycles mean new capabilities take months to reach users.

#### Legacy Architecture

Aging systems are costly, fragile, and incompatible with modern platforms

#### Technical Debt

Years of workarounds consume developer capacity and elevate risk

#### Slow Delivery Cycles

New capabilities take months — requirements drift before delivery

#### Late Security Integration

Security found at deployment means costly rework and delays

## OUR SOLUTION

### Modern Applications Delivered Through Agile & DevSecOps

Synergistic Agility delivers a complete Application Modernization & DevSecOps solution — combining architecture assessment, cloud migration, CI/CD pipeline automation, security integration, test automation, and managed delivery operations into a single program.

## HOW WE DELIVER

Assess

Design

Modernize

Automate

Support

# SYNERGISTIC AGILITY

## SBA 8(a)

Streamlined federal procurement

## IBM Partner

Certified in watsonx, Maximo & more

## Federal Exp.

Proven agency deployments

## Agile

Working solutions from sprint one

## Managed Ops

Ongoing support & improvement

## Mission Focus

Every outcome tied to impact

### EXAMPLE USE CASES

#### Legacy Modernization

Transform monolithic apps into cloud-native, scalable architectures

#### DevSecOps Transformation

Automated CI/CD pipelines with shift-left security integration

#### Cloud Migration

Move to AWS GovCloud, Azure Government, or hybrid cloud environments

#### API Modernization

Expose legacy system capabilities through modern REST APIs

#### Citizen Services Modernization

Section 508 accessible, mobile-first public-facing applications

#### Test Automation

80%+ automated test coverage reducing manual QA burden

### SOLUTION COMPONENTS

#### Advisory

- App assessment
- Architecture review
- Cloud readiness

#### Technology

- CI/CD pipelines
- Cloud platforms
- Security tooling

#### Accelerators

- Pipeline templates
- Component libraries
- Security patterns

#### Managed Support

- Pipeline ops
- Release management
- Improvement

**Key Platforms** GitHub Actions | Azure DevOps | AWS GovCloud | Kubernetes | OpenShift | IBM ELM  
*Technology supports the solution. It is not the solution.*
